BOOK SYNOPSIS

As the definition of designer expands and architects today create everything from jewelry to urban masterplans, a new wave of objects ranging from furniture to small-scale architectural inventions is transforming our interior spaces. Boosted by digital design and manufacturing possibilities, a rising global group of independent makers is making this crossover of furniture and architecture one of the hottest and most innovative fields of design. *Furniture* presents some two hundred examples of this new design typology, by renowned architects and designers from around the globe, including Danish studio KiBiSis design for a reconfigurable bookshelf system, Japanese architect Shigeru Ban moving boxes within rooms, Dutch designers Makkink & Beys conversational Ear Chairs and French atelier 37.2s series of self-standing cubes.
